## EXPERTISE

---

1. **MRI Imaging-Functional Connectivity:** April 29 – May 3, 2019 (Mon-Fri) “Learning the CONN Toolbox” workshop at The Athinoula A. Martinos Center for Biomedical Imaging at “Massachusetts General Hospital – Harvard Medical School”; CONN is an SPM-based toolbox for functional connectivity analyses in the resting state and during task.
2. **MRICloud training** – March 5–7 2019 “Johns Hopkins University”. MRICloud is cloud platform designed for automated image analysis. It has unique features focusing on anatomical segmentation and integration of multiple MRI results. The tutorial is a three-day session including image analysis for T1-based morphology, DTI analysis, rs-fMRI analysis, ASL analysis and application of R to MRICloud results.

**Jan.–2006** Erasmus Program – Computational Linguistics, University of Skövde, Skövde, Sweden

## ACADEMIC POSITIONS

---

04/01/2018–Present **Johns Hopkins University – Department of Neurology**

*Postdoctoral Research Fellow*

I study the speech and language of individuals with Primary Progressive Aphasia and Alzheimer's Disease to identify objective measures that can enable their diagnosis early, provide prognosis of their condition, and ultimately improve therapy. I employ natural language processing, acoustic analysis, and machine learning models (deep neural networks, SVMs, etc.). This research is part of the research project titled "Effects of transcranial direct current stimulation (tDCS) in primary progressive aphasia (PPA)". Number: NA\_00071337. PI: Dr. Kyrana Tsapkini. Sponsor: Johns Hopkins University; Collaborators: National Institutes of Health (NIH) and National Institute on Deafness and Other Communication Disorders (NIDCD).

2018–2019 **University of Gothenburg – Department of Swedish**

*Researcher*

I identify objective markers from speech and language to provide early diagnosis of individuals with Mild Cognitive Impairment, the research is part of the project: "Linguistic and extra-linguistic parameters for early detection of cognitive impairment". Grant from the "Riksbankens Jubileumsfond" – The Swedish Foundation for Humanities and Social Sciences, grant agreement no: NHS 14–1761:1, 2016–2019. Principal Investigator: Dr. Dimitrios Kokkinakis.

2015–2017 **University of Gothenburg – Centre for Linguistic Theory and Studies in Probability (CLASP)**

*Post-doctoral fellow*

My research aim was to determine the cognitive foundations of language by developing efficient language technology. CLASP director: Professor, Shalom Lappin.

2015 **Princeton University – The Seeger Center at Princeton University**

*Visiting research scholar*

I conducted research on prosodic variation and change in Greek. It refers to the use of speech melody for linguistic purposes. To study prosody I developed an innovative approach that combines evidence from prosodic typology, experimental research on Modern Greek and other languages, and evidence from ancient grammarians (as a PI).
